# SMART PARKING APP

---

Arun Mugilan A/L Sargunan S63746

# Functions that my app offers

Brings a easier way to book parking to the palm of your hand.

Login / Register

Register Parking Lot (Admin)

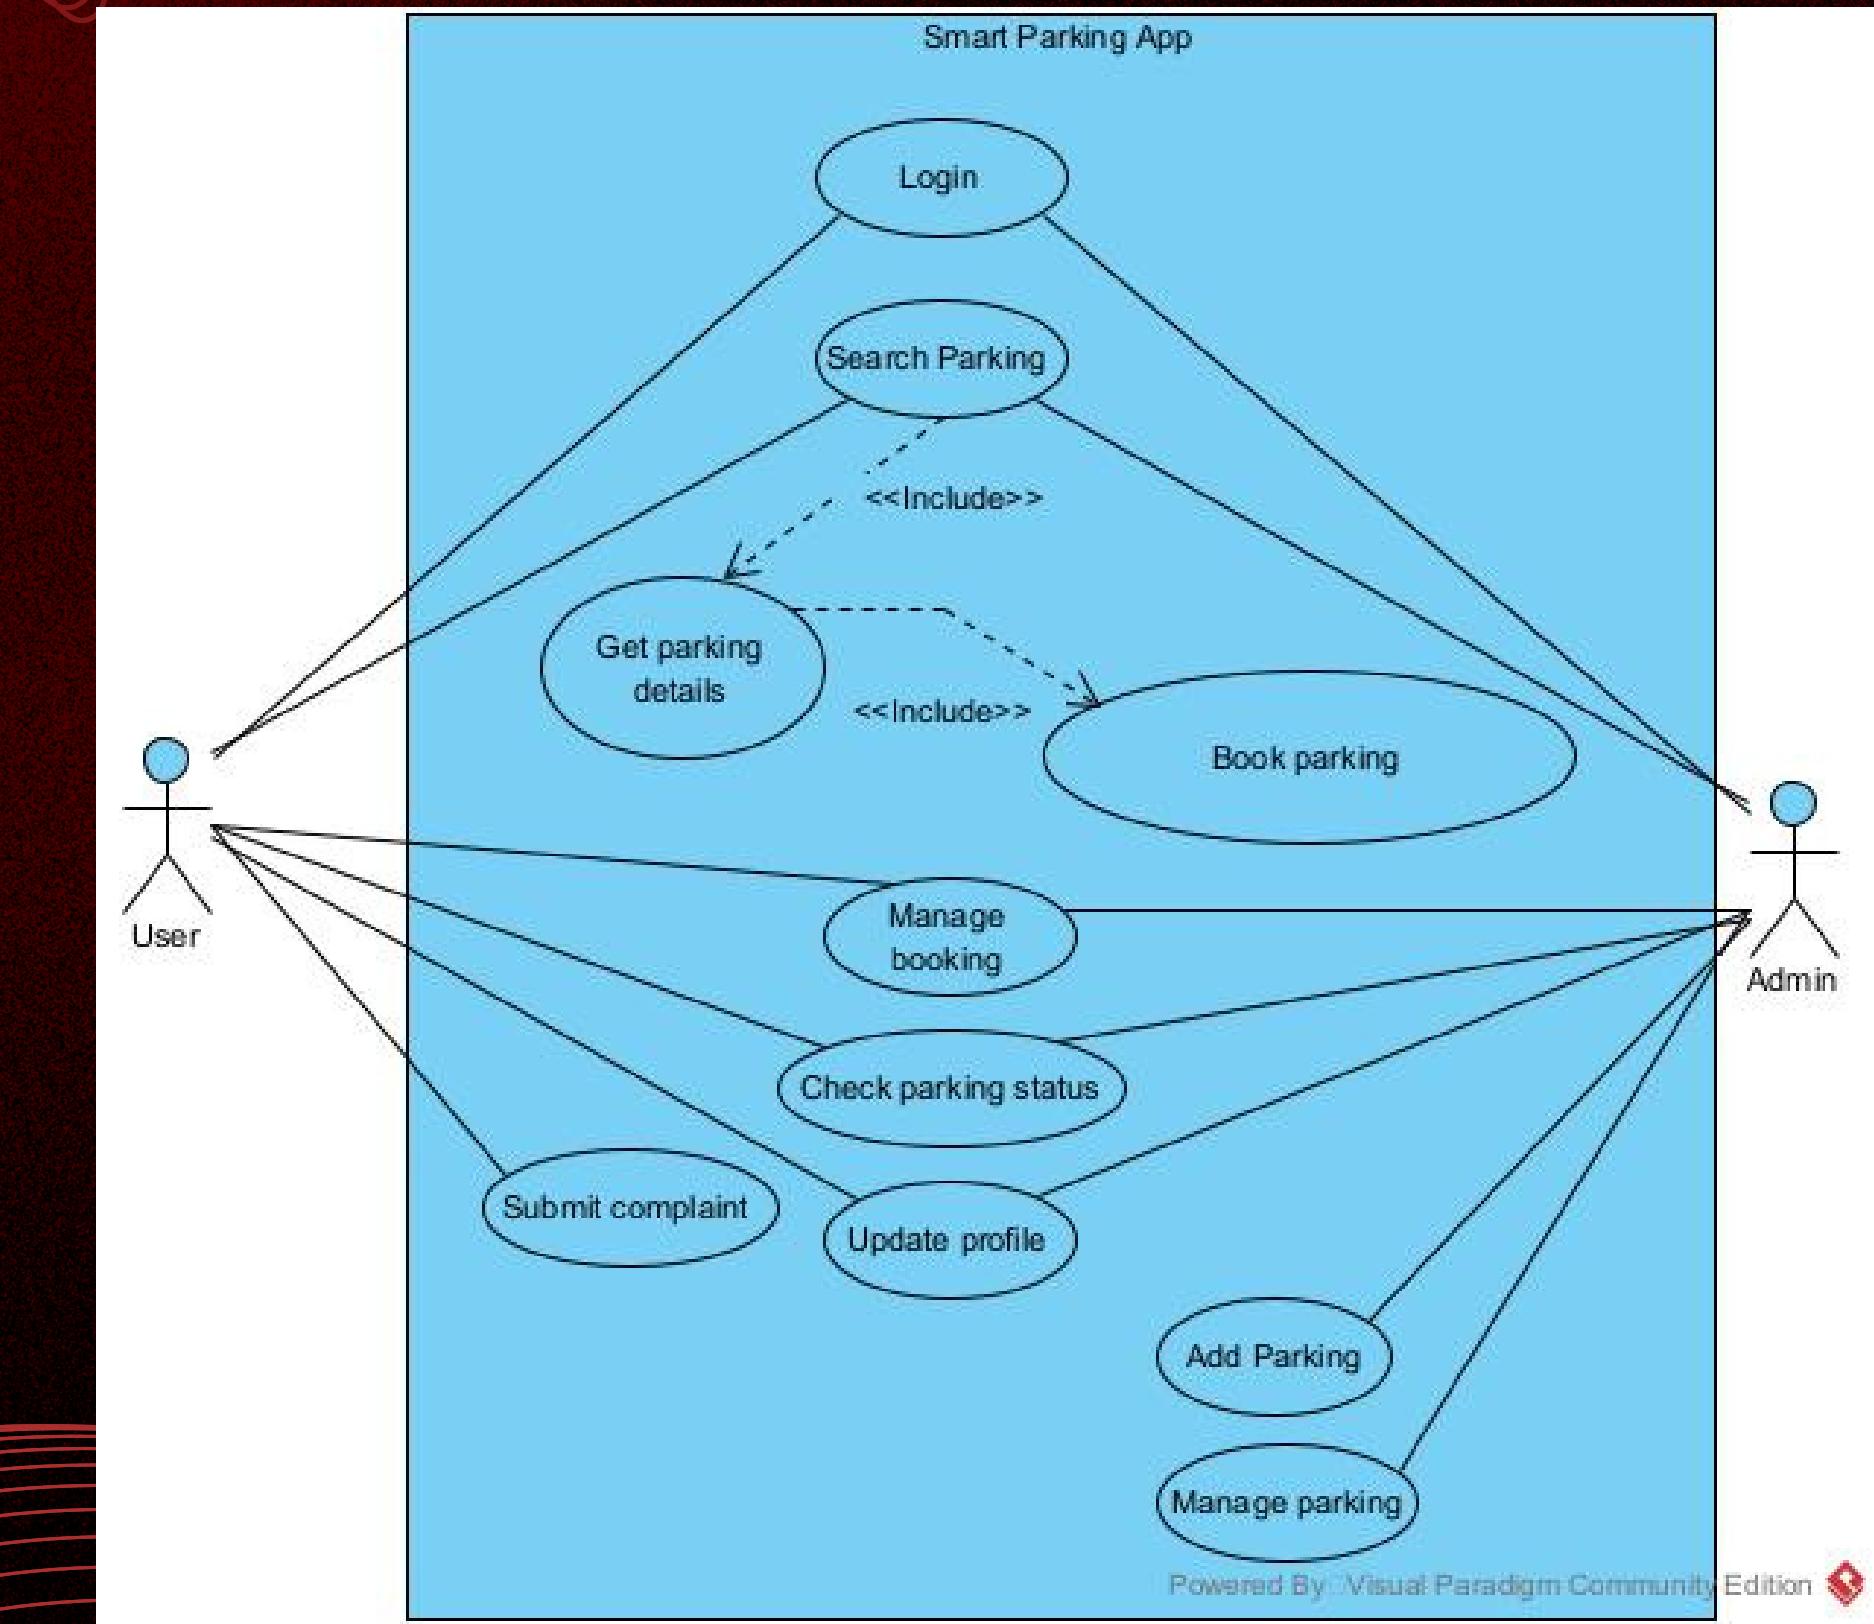

Update Parking Status

Complaint

View Parking Utilization

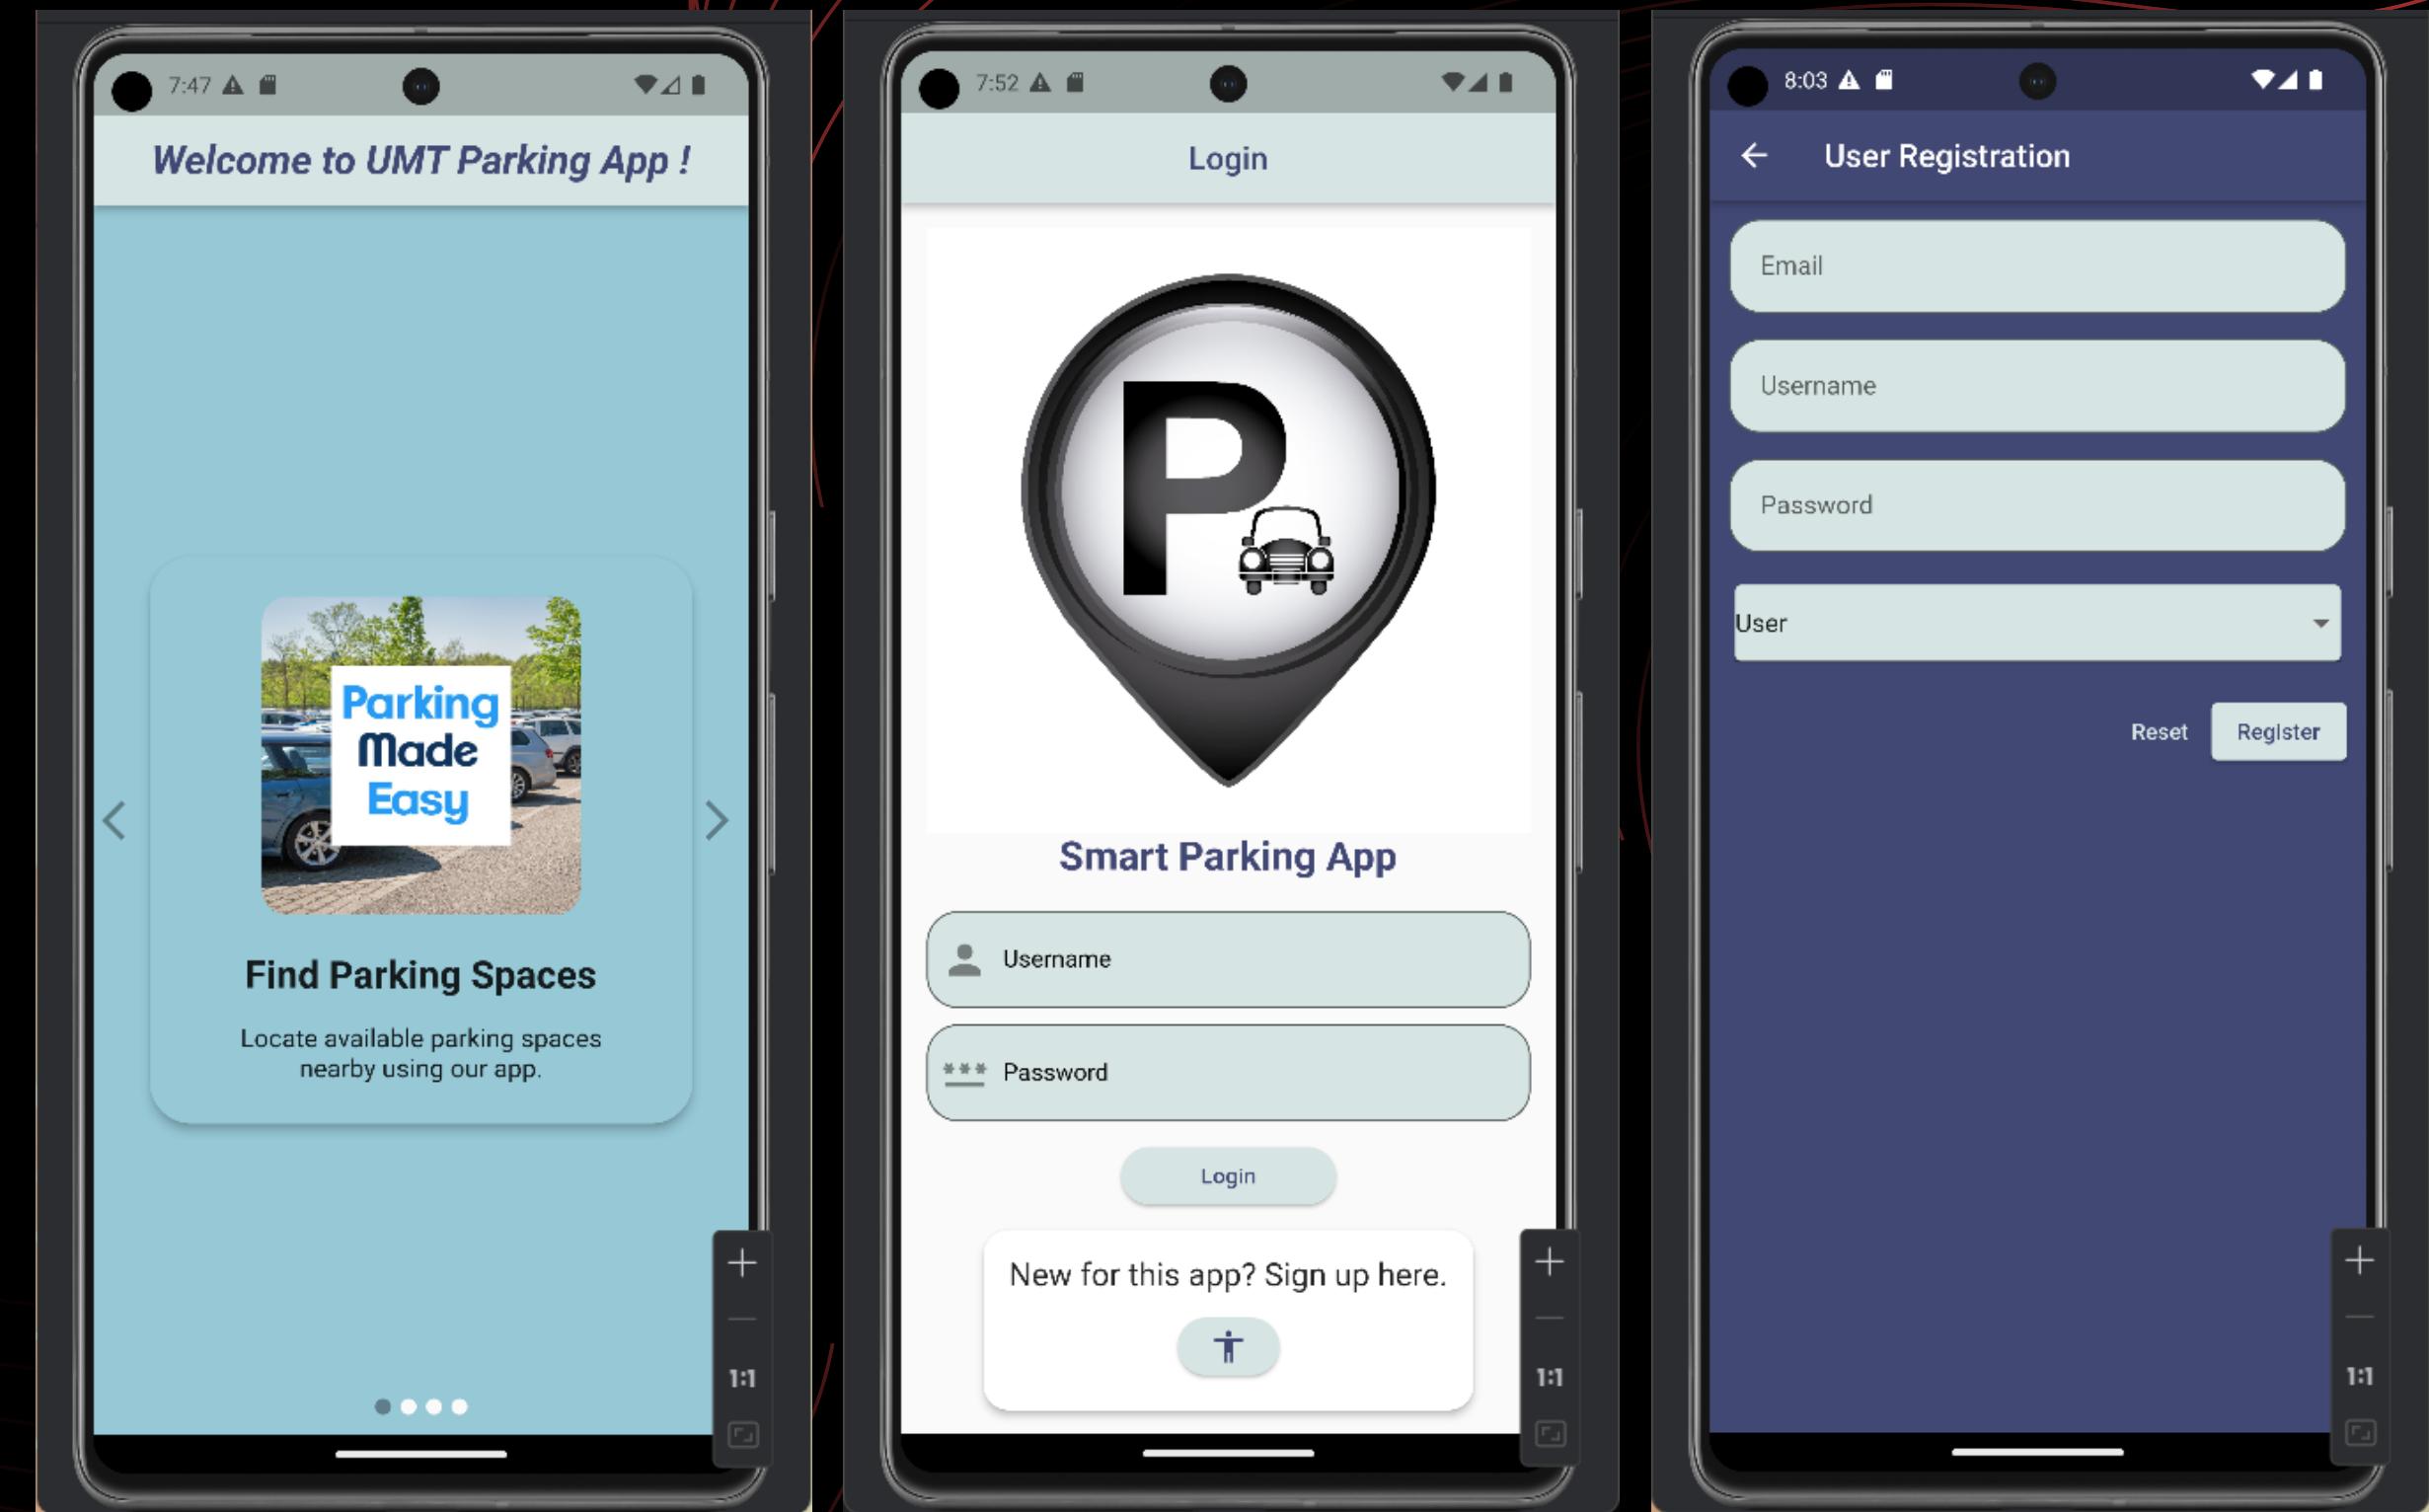

# USE CASE OF THE SMART PARKING APP

**Users** of the **Smart Parking App** may log in to manage reservations and personal data, obtain parking records, and file complaints. Users may quickly check the status of their reserved spots and look for open parking spots based on availability and location. Users of the app may make changes to their accounts and reserve parking ahead of time. The ability to create, modify, or remove parking spots is available to **administrators**. Furthermore, some users can add additional parking spots to the app, such as parking administrators.

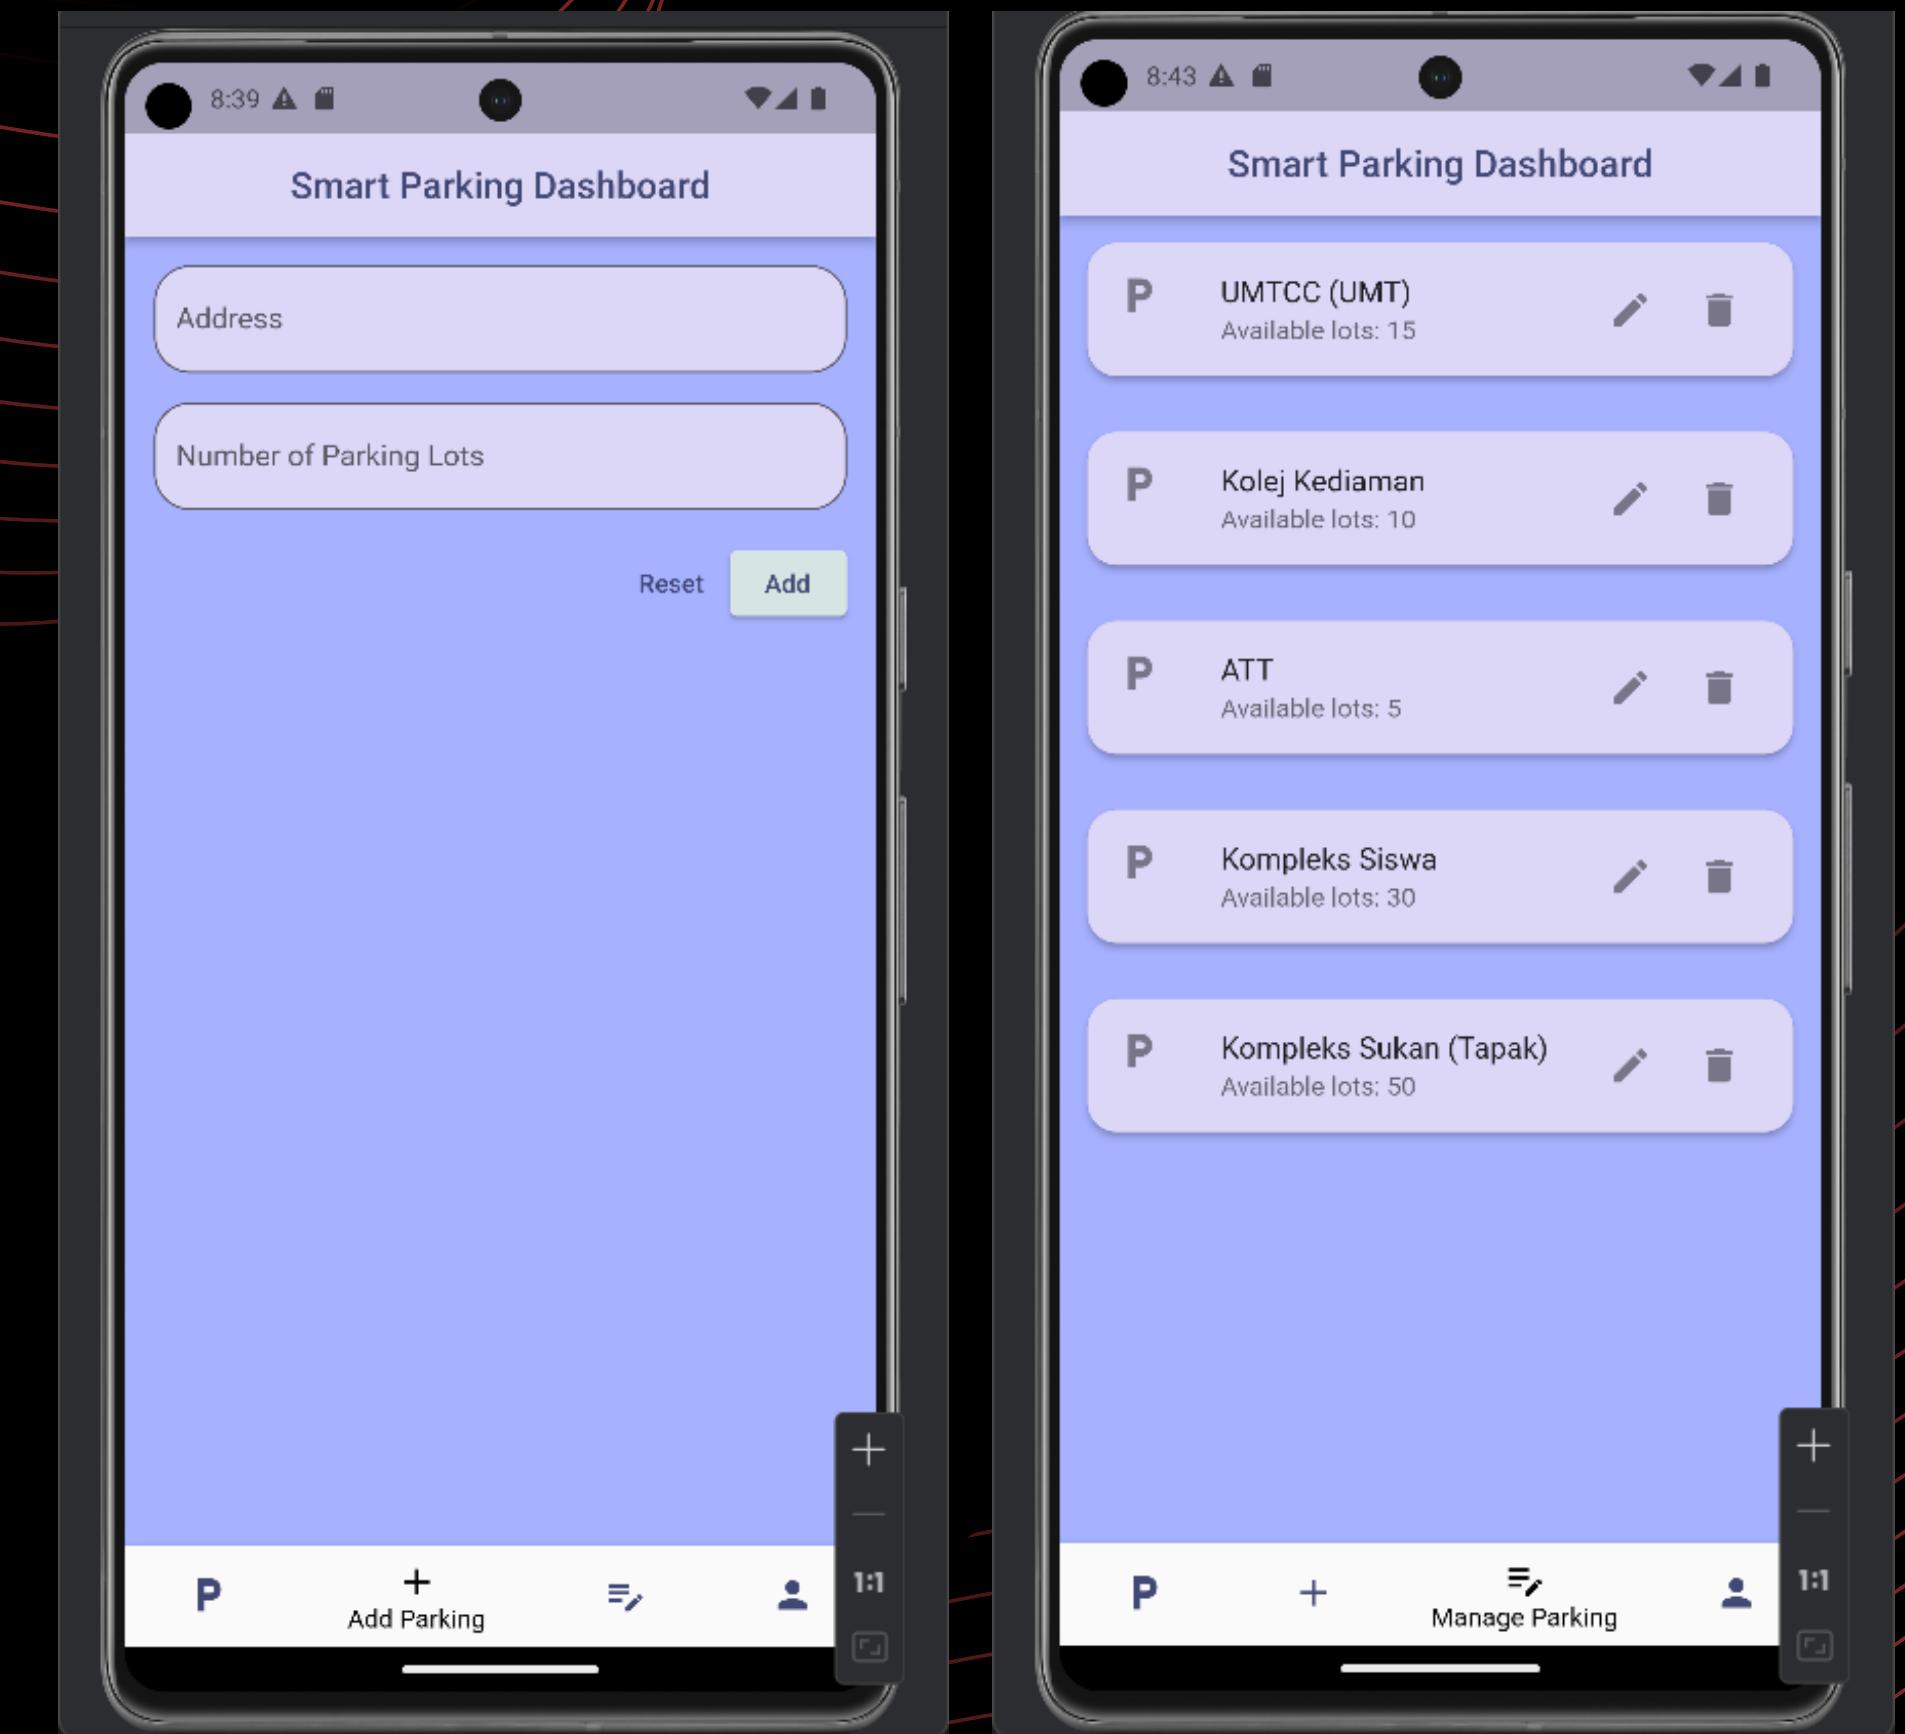

## Login & Register

- Welcome
- Login Screen
